

AVSEC-009 – INERT EXPLOSIVES CONCEALED IN MEDICAL EQUIPMENT

ABOUT THIS KIT

This kit includes IEDs (Improvised Explosive Devices) concealed in medical equipment that simulate genuine IEDs, including their four main components – explosives, initiator, operating mechanism and a power source.

TARGET AUDIENCE

This kit and its components are designed for the teaching and training of security personnel conducting covert testing and auditing at the airport security system or other secured facilities.

The kit is designed mainly for security personnel operating X-Ray equipment, Hold Baggage Screening (HBS) systems such as Explosives Detection Systems (EDS), Advanced Technology (AT) Systems, Multi view Tomography (MVT) and more.

Security managers and regulatory Red Teams can use this kit to test checkpoint and equipment qualification.

* A four-day screeners course is recommended when purchasing this kit.

TECHNICAL SPECIFICATIONS

The kit includes simulated IEDs concealed in the following items:

- Blood Pressure Gauge
- Nebulizers
- First Aid Kit
- Cervical Collar
- Folding Walking Cane
- Breast Pump
- Ankle Brace Support
- Back Brace

* Items may vary according to inventory.

Simulants, packing, accessories and QC specifications:

- The kit contains an instructional booklet including X-Ray images and pictures of the concealment process.
- Quality control includes testing with X-Ray and CT machines.
