

SILHOUETTE TRAINING KIT

X-TEST Product No.: SECUR0012

ABOUT THIS KIT

The Silhouette Training Kit was specially designed to increase the level of readiness and awareness of security staff & personnel. It does so by significantly simplifying the training and exercise routine while maintaining safe and secure environment at all times. The Silhouette Training kit contains uniquely constructed plates. When screened in an X-Ray machine, the plates provide X-Ray images of various prohibited items (each plate imitate a different item), among of which are hand guns, grenades and knives. The plates are completely safe to use and obviate the necessity in using real hazardous materials and items.

X-TEST first introduced the Silhouette Training Kit at Milipol 2013, where it was widely acclaimed by visitors and exhibitors. Since then, it has been delivered around the world to customers from multiple sectors, including airports, airlines, prisons and critical infrastructures, many of whom use it today as an integral feature in their training modules.

TARGET AUDIENCE

This kit and its components are designed for training and testing X-Ray equipment operators in various secured facilities.

TECHNICAL SPECIFICATIONS

The Silhouette kit contains the following items:

1. Pistol
2. Hand Grenade
3. Opinel Knife
4. Multi-tool

The hand grenade, knife & multi-tool come in a variety of configurations.
